PROFESSIONAL SUMMARY

Results-driven Data Analyst and AI Solutions Developer with 3+ years of progressive experience across business intelligence, process automation, and full-stack AI deployment. Proven track record of building end-to-end systems that eliminate manual workflows and deliver measurable operational impact from a custom payroll solution that reduced a one-week process to a single day, to an agentic AI voice system serving 3 franchise clients. MSc Business Analytics, University of Surrey. Full project portfolio, live demos, and case studies available at varunthallapelly.com.

WORK EXPERIENCE

Data Analyst

Oct 2024 – Present

San Damiano Corporation Ltd. (SD Care Agency) · Guildford, UK

- Collaborated directly with the CEO and Finance Manager to build a 5-year strategic business plan and financial restructuring model to support group-level expansion.
- Developed a fully custom in-house payroll system (Python, MongoDB, React JS) integrating data from multiple clock-in platforms, reduced a one-week manual payroll process to a single day.
- Led website consolidation and digital infrastructure project, unified two company sites into a single high-performance platform with AI smart search, SEO optimisation, Google Ads and Meta Ads, Google Tag Manager, and Google Analytics 4.
- Built an automated accounts receivable and invoicing system pulling live data from Nourish Care software, generating monthly and bi-weekly client invoices, cut a two-week cycle to one day.
- Designed and deployed end-to-end business intelligence infrastructure, built KPI frameworks and interactive Power BI dashboards monitoring performance across HR, Finance, and Operations in real time.
- Conducted deep-dive process analysis across all business units, identifying inefficiencies and implementing data-driven optimisations that materially reduced operational overhead.
- Delivered an end-to-end HR automation suite covering training tracking, recruitment pipeline management, annual leave, appraisals, and QCS policy compliance.
- Supported ISO 9001:2015 quality management audits and CQC inspections, both SD Care entities achieved a Good CQC rating.
- Built and deployed an AI-powered companion app (Web, Android, iOS) for healthcare clients, improving client engagement and daily wellbeing communication.

IT Executive

Nov 2023 – Sep 2024

San Damiano Corporation Ltd. (SD Care Agency) · Guildford, UK

- Integrated and managed Mindbody CRM for Omnia Lifestyle Limited, handling pricing configuration, booking systems, therapist management, and website chatbot integration for digital client engagement.
- Developed a Field Supervision Report application (phone, tablet, desktop) for the domiciliary care team enabling live carer supervision, performance rating, feedback recording, and offline report generation.
- Built an automated HR operations application combining annual leave computation, HR meeting invitation generation, and resignation acceptance processing, enabling the HR team to prepare and send documentation in minutes.
- Developed an appraisal form application (AppSheet) - HR sets objectives, routes to line manager for review and rating, auto-generates a formatted PDF on completion.
- Built an in-house training tracker dashboard connected to CareSkills online training platform with live completion dashboards, targeted email actions, and automated weekly status reminders.
- Designed and implemented an end-to-end hiring process tracker on Monday.com covering the full recruitment pipeline from CV receipt through to onboarding, with a centralised employee database.
- Acted as the internal technical lead bridging business requirements and technology delivery across HR, Finance, Operations, and Marketing.

Data Analyst

Oct 2022 – Jul 2023

Trade Wins Ltd · Remote, India

- Designed dashboards and reporting templates to support business decision-making and performance tracking.
- Managed and optimised SharePoint and database systems to improve data accessibility and integrity.
- Automated administrative workflows, reducing manual effort for HR and finance processes.
- Provided analytical insights for project planning, recruitment administration, and performance management.

KEY PROJECTS

Full case studies, demos, and technical breakdowns for all projects available at varunthallapelly.com/projects

Agentic AI Customer Support System — Multi-tenant AI voice agent serving 3 optical gallery franchises simultaneously. 24/7 inbound handling, 72 languages, real-time tone analysis, automated outbound campaigns.

In-House Payroll Software — Custom Python/MongoDB/React JS payroll system generating timesheets in under 5 seconds and QuickBooks-compatible exports in under 10 seconds — 1-week process to 1 day.

Accounts Receivable & Invoicing Software — Automated invoicing system integrated with Nourish Care, generating monthly and bi-weekly client invoices in Excel and PDF — 2-week cycle to 1 day.

HR Automation Suite — End-to-end HR platform covering training tracking, appraisals, recruitment pipeline, annual leave, and QCS policy compliance with automated notifications and reporting.

Field Supervision Report Application — Cross-platform app (phone, tablet, desktop) for domiciliary care supervisors, live carer rating, rota-based assignment, offline report generation and dashboard.

AI Buddy App — Healthcare — AI-powered companion app deployed on Web, Android, and iOS supporting healthcare client engagement, communication, and daily wellbeing.

AI Interview Simulator — Agentic AI acts as a recruiter, conducting personalised mock interviews from a candidate's CV and job description — provides detailed coaching and performance scoring.

Motor Insurance Pricing Analytics — Predictive pricing model using historical claims data, improved pricing accuracy by 27% and reduced cost of risk by 15%.
